

2.3.2 Any other Relevant Information

INTRODUCTION :

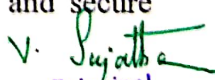

Simulation lab helps to bridge the gap between theory and clinical. It helps the nursing student to learn in a safe & supportive environment; become confident in dealing critical conditions and gain experience for the same. Simulators are available in the Clinical lab at Sri Venkateswara College of Nursing. Procedures were demonstrated by the teaching faculty to the students based on their curriculum requirement.

OBJECTIVES:

- ✦ Simulation lab helps to provide advanced and innovative educational equipments for the Faculty and the Students
- ✦ To provide hands on learning experiences specific to course outcomes as directed by curriculum
- ✦ Foster the better independent and career opportunities for the student learning
- ✦ Accommodate unique teaching and learning needs of the faculty and students with diverse backgrounds, abilities and educational experiences.
- ✦ To motivate, foster and reinforce learning techniques by using simulation technology related to resources feasibility for the futuristic needs

RESPONSIBILITIES OF THE LAB INCHARGE

- Maintain the lab inventory on regular basis without fail periodically
- Preparing and ordering the indent needed for the practical purpose
- Managing the clinical skill labs by establishing and updating laboratory policies and procedures according to the needs of the students
- Lab In-charge participates in the learning needs of the students by supervising during the lab hours according to the time table
- Contributes a safe environment in the clinical skill lab with safety and secure measures
