- Evaluation

Outcome of the Programme

Map where in the curriculum students have the opportunity to work toward the stated outcomes. Develop a method(s) of discovering if students have met the learning outcomes in the appropriate places in the curriculum. directly relate to the learning intentions or particular learning outcome. are explicit about what learners are required to do. are time efficient and manageable. include clear and explicit assessment criteria. provide challenge for the full range of learners being assessed. Clear, shared, implementable goals are the cornerstone for assessment that is focused and useful. Assessment requires attention to outcomes but also and equally to the experiences that lead to those outcomes. Information about outcomes is of high importance; where students "end up" matters greatly.
