3. Circulation to all Staff members

Objective of the Programme:-

Teaching and learning approaches as theoretical concepts that describe on a meta-level how learning should be facilitated. The Approaches to Learning domain focuses on how children learn. It refers to the skills and behaviours that children use to engage in learning. It incorporates emotional, behavioural, and cognitive self-regulation as well as initiative, curiosity, and creativity. Perhaps the most simple way of describing 'learning styles' is to say that they are different methods of learning or understanding new information, the way a person takes in, understand, expresses and remembers information.
