Objective of the Programme:-

The primary purpose of theory in nursing is to improve practice by positively influencing the health and quality of life of patients. Nursing theories are also developed to define and describe nursing care, guide nursing practice, and provide a basis for clinical decision-making. Nursing theory helps distinguish nursing as a separate discipline from medicine and related sciences, and assists nurses in understanding their patients and their needs. The theory provides different templates to help nurses provide care that respects patients and improves outcomes.

College:-

Topics covered:-

- Environmental theory.
- Theory of interpersonal relations.
- Nursing need theory.
- Care, cure, core theory.
- Nursing process theory.
- Theory of human caring.
- Self-care theory.
- Transcultural nursing theory

Outcome of the Programme:-

This nursing model holds that people want to take care of themselves, and that those in the nursing profession can enhance patient care by allowing the patient to do as much of their own self-care as they are capable. Nursing theory helps distinguish nursing as a separate discipline from medicine and related sciences, and assists nurses in understanding their patients and their needs. The theory provides different templates to help nurses provide care that respects patients and improves outcomes.
