2. Principal
3. Circulation to all Staff members

Objective of the Programme

Online education enables the teacher and the student to set their own learning pace, and there's the added flexibility of setting a schedule that fits everyone's agenda. As a result, using an online educational platform allows for a better balance of work and studies, so there's no need to give anything up. Many experts believe online learning is the future of education. As technology becomes more widely available, an increasing number of students will gain access to the kind of knowledge that can vastly improve their career prospects, and maybe even the world.

Objective of the Programme:-

Avoid talking about the virus with people who tend to be negative or who reinforce and ramp up your fears. Turn to the people in your life who are thoughtful, level-headed, and good listeners. If you don't have someone you trust to turn to, apps such as 7 Cups are a good resource for free, emotional support. In extreme cases, people may suffer from depression characterized by low mood, tiredness, pessimism, poor sleep, and appetite, feeling helpless, guilty, and hopeless, with a gradual reduction in work output. Older people are more vulnerable, and special care must be taken for them.

Route Map:-

College:-

Topics covered:-

- Low mood
- Tiredness
- Pessimism
- Poor sleep
- Appetite
- Feeling helpless
- Guilty
- Hopeless, with a gradual reduction in work output

Outcome of the Programme:-

You feel yourself getting caught up in fear of what might happen, try to shift your focus to things you can control. For example, you can't control how severe the coronavirus outbreak is in your city or town, but you can take steps to reduce your own personal risk. Take up a relaxation practice. When stressors throw your nervous system out of balance, relaxation techniques such as deep breathing, meditation, and yoga can bring you back into a state of equilibrium. Regular practice delivers the greatest benefits, so see if you can set aside even a little time every day.

All the faculty members are informed that our college is organizing one week Faculty Development Programme on **“Basics of the ECG Interpretation”** from 16-11-2020 to 21-12-2020 by distinguished resource speakers. Request all the teaching staff members must attend the Programme without fail.

Edna Sweenie
IQAC

V. Sujatha
PRINCIPAL

Copy to:

1. Chairman for Favour of information
2. Principal
3. Circulation to all Staff members

Objective of the Programme:-

ECG interpretation includes an assessment of the morphology (appearance) of the waves and intervals on the ECG curve. Therefore, ECG interpretation requires a structured assessment of the waves and intervals. Before discussing each component in detail, a brief overview of the waves and intervals is given. The time between two specific ECG events. The intervals commonly measured on an ECG include the PR interval, QRS interval (also called QRS duration), QT interval and RR interval. The standard 12-lead electrocardiogram (ECG) is one of the most commonly used medical studies in the assessment of cardiovascular disease.

Outcome of the Programme:-

An ECG is often used alongside other tests to help diagnose and monitor conditions affecting the heart. It can be used to investigate symptoms of a possible heart problem, such as chest pain, palpitations (suddenly noticeable heartbeats), dizziness and shortness of breath. Nurses who are trained to read ECGs can improve patient care through the early identification of actual or potential complications and the prompt referral of patients. These nurses are also equipped to explain conditions and treatments to patients when they are asked to do so.

Date: 25-12-2020

PROGRAMME REPORT

Name of the programme : A One Week Faculty Development Programme on
"Basics of the ECG interpretation"

Dates : 16-11-2020 to 21-12-2020

Details of Resource Person:

Name : P. Mogileeswari
Designation : Assoc. Professor
Organization : Narayana college of nursing
Ph. No : 9603764194
Mail. Id : Susannapujari77@gmail.com

Objective of the Programme:

ECG interpretation includes an assessment of the morphology (appearance) of the waves and intervals on the ECG curve. Therefore, ECG interpretation requires a structured assessment of the waves and intervals. Before discussing each component in detail, a brief overview of the waves and intervals is given. The time between two specific ECG events. The intervals commonly measured on an ECG include the PR interval, QRS interval (also called QRS duration), QT interval and RR interval. The standard 12-lead electrocardiogram (ECG) is one of the most commonly used medical studies in the assessment of cardiovascular disease.

Topics covered:

- P wave
- Q wave
- R wave
- S wave
- T wave and
- U wave

Outcome of the Programme:

An ECG is often used alongside other tests to help diagnose and monitor conditions affecting the heart. It can be used to investigate symptoms of a possible heart problem, such as chest pain, palpitations (suddenly noticeable heartbeats), dizziness and shortness of breath. Nurses who are trained to read ECGs can improve patient care through the early identification of actual or potential complications and the prompt referral of patients. These nurses are also equipped to explain conditions and treatments to patients when they are asked to do so.

1. Chairman for Favour of information
2. Principal
3. Circulation to all Staff members

Objective of the Programme:-

An infection control nurse is a registered nurse (RN) who implements best practices for halting the spread of viruses and bacteria and delivers top care to patients who have contracted infectious diseases. Safety and Infection Control, a key subpart of Safe and Effective Care Environment, addresses the nurse's ability to manage care with the best practices of reducing hazards while providing both emergent and non-emergent responses to numerous situations. There are many things you can do to help protect yourself and others: Wash your hands with soap and water throughout the day. Get recommended vaccinations to prevent infectious diseases such as measles and chicken-pox. Practice safer sex to protect against sexually transmitted infections.

About the Institute:-

Sri Venkateswara College of Nursing was started in the year 1982 with the ambience of providing Nursing education to the poor and under privileged. The Motto of the College is to provide excellent education and expertise skills in Nursing Practice. The College has been sanctioned by the AP State Government, approved by AP Nursing Council and Recognized by Indian Nursing Council, New Delhi. It is affiliated by Dr. NTR University of Health Sciences, Vijayawada. This institute is promoted by Srinivasa Educational Academy under the watchful eyes of Dr. Ravuri Venkataswamy, the Group has group of selfless, dedicated and hardworking people whose endeavor in providing and establishing good professional education to the students has been a relentless effort on their part. The Institute has got adequate buildings and other infrastructure facilities located very near to the temple city.

The ANM & GNM Courses was started in the year 1982 and 1983 respectively where as the B.Sc Nursing was started in the year 2002 in Chittoor, Tirupati and Hyderabad. Till Now ANM - 1080 Students, GNM - 1960 Students and B.Sc. - 812 Students has passed out from the Institute. The Nursing students studied in the institution are employed all around India and also in abroad. The students studied in these Nursing institutions are working in institution like CMC-Vellore, Apollo Hospital-Chennai and in so many prestigious hospi-

We are competing with other world class institutions by providing excellent upto date knowledge to the students by highly qualified faculty. Good clinical experience with well equipped laboratories and in District head quarters Hospital.

The college is permitted by INC, New Delhi, AP Nursing Council, Hyderabad and affiliated to Dr. NTR University of Health Sciences, Vijayawada. The College has experienced faculty for paving way for best academic and clinical performance of the students.

We have our parent hospital by name RVS Hospitals & Research Foundation. It is Multi Specialty Hospital which consists of 450 beds with well equipped departments.

Route Map:-

College:-

Topics covered:-

- Disinfection and sterilization.
- Environmental infection control.
- Hand hygiene.
- Isolation precautions.
- Multidrug-resistant organisms (MDRO)
- Catheter-associated urinary tract infections (CAUTI)
- Intravascular catheter-related infection (BSI)
- Organ transplantation

Outcome of the Programme:-

- Hand Washing.
- Infection control standard, contact, droplet and airborne precautions.
- Procedures for decontamination of persons and disinfection of equipment and the environment.
- Quarantine of contacts (if necessary)
- Prophylaxis of exposed individuals.
- Control of the vectors of infection

Objective of the Programme:-

Research ethics involves the application of fundamental ethical principles to research activities which include the design and implementation of research, respect towards society and others, the use of resources and research outputs, scientific misconduct and the regulation of research. There are several reasons why it is important to adhere to ethical norms in research. First, norms promote the aims of research, such as knowledge, truth, and avoidance of error. For example, prohibitions against fabricating, falsifying, or misrepresenting research data promote the truth and minimize error.

Objective of the Programme:-

Biostatistics is the application of statistical techniques to scientific research in health-related fields, including medicine, biology, and public health, and the development of new tools to study these areas. Statistics in research deals with basics in statistics that provides statistical randomness and law of using large samples. Statistics teaches how choosing a sample size from a random large pool of sample helps extrapolate statistical findings and reduce experimental bias and errors. Biostatistics provides the foundation of much epidemiological research. In other words, epidemiologists often use biostatistical principles and methods to draw data-backed mathematical conclusions about population health issues.

ONE WEEK FDP PROGRAMME

RESEARCH METHODOLOGY
AND BIO-STATISTICS

Dates:

20-09-2021 to 25-09-2021

Venue:

College Seminar Hall,
Sri Venkateswara college of Nursing
RVS Nagar, Tirupati Road,
Chittoor 517127.
Andhra Pradesh
INDIA

About the Institute:-

Sri Venkateswara College of Nursing was started in the year 1982 with the ambience of providing Nursing education to the poor and under privileged. The Motto of the College is to provide excellent education and expertise skills in Nursing Practice. The College has been sanctioned by the AP State Government, approved by AP Nursing Council and Recognized by Indian Nursing Council, New Delhi. It is affiliated by Dr. NTR University of Health Sciences, Vijayawada. This institute is promoted by Srinivasa Educational Academy under the watchful eyes of Dr. Ravuri Venkataswamy, the Group has group of selfless, dedicated and hardworking people whose endeavor in providing and establishing good professional education to the students has been a relentless effort on their part. The Institute has got adequate buildings and other infrastructure facilities located very near to the temple city.

The ANM & GNM Courses was started in the year 1982 and 1983 respectively where as the B.Sc Nursing was started in the year 2002 in Chittoor, Tirupati and Hyderabad. Till Now ANM – 1080 Students, GNM – 1960 Students and B.Sc. – 812 Students has passed out from the Institute. The Nursing students studied in the institution are employed all around India and also in abroad. The students studied in these Nursing institutions are working in institution like CMC-Vellore, Apollo Hospital-Chennai and in so many prestigious hospi-

We are competing with other world class institutions by providing excellent upto date knowledge to the students by highly qualified faculty. Good clinical experience with well equipped laboratories and in District head quarters Hospital.

The college is permitted by INC, New Delhi, AP Nursing Council, Hyderabad and affiliated to Dr. NTR University of Health Sciences, Vijayawada. The College has experienced faculty for paving way for best academic and clinical performance of the students.

We have our parent hospital by name RVS Hospitals & Research Foundation. It is Multi Specialty Hospital which consists of 450 beds with well equipped departments.

Route Map:-

College:-

Topics covered:-

- Longitudinal data.
- Survival and event history analysis.
- Missing data and measurement error.
- Community studies.
- High dimensional data.
- Collaborative research

Outcome of the Programme:-

Collecting, analysing, and interpreting data are essential components of biomedical research and require biostatistics. Doing various statistical tests has been made easy by sophisticated computer software. Biostatistics mainly addresses the development, implementation, and application of statistical methods in the field of medical research. Therefore, an understanding of the medical background and the clinical context of the research problem they are working on is essential for biostatisticians. Biostatisticians collect and analyse data for biology and public health purposes using math and statistics. Biostatisticians are critical to advancing groundbreaking research, from medicine to agriculture to public health.

:-Organising Secretary:-

Mrs. Vasantha Kumari C
Asst. Professor

PROGRAMME REPORT

Name of the programme : A One Week Faculty Development Programme on
“Research Methodology and Bio-Statistics”

Dates : 20-09-2021 to 25-09-2021

Details of Resource Person:

Name : Dr. K. Devika

Designation : Professor

Organization : Shanmuga college of nursing, Salem

Ph. No : 9597028128

Mail. Id : saravananraja@yahoo.com

Objective of the Programme:

Biostatistics is the application of statistical techniques to scientific research in health-related fields, including medicine, biology, and public health, and the development of new tools to study these areas. Statistics in research deals with basics in statistics that provides statistical randomness and law of using large samples. Statistics teaches how choosing a sample size from a random large pool of sample helps extrapolate statistical findings and reduce experimental bias and errors. Biostatistics provides the foundation of much epidemiological research. In other words, epidemiologists often use biostatistical principles and methods to draw data-backed mathematical conclusions about population health issues.

Topics covered:

- Longitudinal data.
- Survival and event history analysis.
- Missing data and measurement error.
- Community studies.
- High dimensional data.
- Collaborative research

Outcome of the Programme:

Collecting, analysing, and interpreting data are essential components of biomedical research and require biostatistics. Doing various statistical tests has been made easy by sophisticated computer software. Biostatistics mainly addresses the development, implementation, and application of statistical methods in the field of medical research. Therefore, an understanding of the medical background and the clinical context of the research problem they are working on is essential for biostatisticians. Biostatisticians collect and analyse data for biology and public health purposes using math and statistics. Biostatisticians are critical to advancing ground-breaking research, from medicine to agriculture to public health.
